

STOCK DISPENSING MACHINE

FULL SALES AUTOMATION

Open 24/7, fully stocked, intuitively simple to use, very efficient and – most importantly – fully automated: these are the retail outlets of the future. Thanks to automated stores, we turn them into advanced vending machines on a large scale.

E-COMMERCE OPTION

A solution dedicated to hypermarkets selling products online. It automates order completion, unburdening store staff and speeding up shipments. With its ongoing analysis of orders, it additionally improves the performance of the stocking model.

SCAN&GO OPTION

According to market research, most products in stores are bought 'mechanically' – without any need for longer (sensory) contact with the product. Therefore, the stock dispensing machine can only be used for regular orders (quick and simple selection using an app), inviting customers to visit the store for any further purchases.

AUTOMATED STORE OPTION

A stock dispensing module integrated with a standalone store, mounted in the store window or as a separate fixture. Stock dispensing machines offer:

- **24/7 availability**, regardless of the shop's business hours,
- **capacity from 2 to 4k** product units,
- **a remedy for understaffing** – personnel is only required for stocking,
- **preview of the selected product** by the customer before purchase,
- **machine learning** – real-time demand analysis and stocking model optimisation.

VVN is a manufacturer of top-class solutions for store and stockroom space management. We offer furniture and fittings for all kinds of retail outlets, along with installation and maintenance services. Other **VVN** companies specialise in modern technologies, lighting fixtures and automation for shops. We operate in an innovative, comprehensive way, in the belief that

FUTURE DOESN'T WAIT IN LINE!
